Hotel Management Project

Description of the work

As the final project of SIBD we decided to do a website that helps anyone to manage and run a hotel(and some extra features) easily.

Honestamente nao sei que escrever.

Applications

- The reservations(booking) of the rooms can be made by the client himself or by a agency.
- The hotel has the following modules: staff and floor organizer
- Multiple room types
- Multiple payment options
- Rating system
- Order service
- Extras ???

Class and Tables

This part of the report will include the tables and classes we will include in our website.
